## Experience

**Freelance Full Stack Developer (HSBC Client)**

May 2025 – Jun 2025

*Remote*

- Built and maintained scalable web application components and backend services for enterprise workflows.
- Developed REST APIs and optimized frontend-backend data communication for production systems.
- Improved maintainability and scalability through modular application architecture.
- Delivered production-ready software solutions following modern development best practices.

## Projects

**AI Prompt Fusion** | *Next.js, React.js, TypeScript, Firebase, Clerk, ShadCN UI*

GitHub | Live

- Developed a Multi-Model AI Chat Platform supporting GPT, Gemini, DeepSeek, Mistral, Grok, and Cohere models.
- Implemented dynamic model selection enabling side-by-side comparison of AI-generated responses.
- Integrated Clerk Authentication and Firebase Firestore for secure user management and persistent chat history.
- Built scalable REST API integrations with Context API state management and responsive UI using ShadCN UI.

**ReachOut – AI Powered Outreach SaaS** | *Next.js, TypeScript, Prisma, PostgreSQL, Gemini AI*

GitHub | Live

- Built a production-ready SaaS platform automating personalized recruiter outreach and job application workflows.
- Integrated Gemini AI to generate personalized recruiter emails from uploaded resume data.
- Implemented authentication, recruiter management, email automation, and application tracking features.
- Designed scalable PostgreSQL database architecture using Prisma ORM.

**GeoAlert – Real-Time Disaster Alert Platform** | *Next.js, TypeScript, Leaflet.js, Prisma, Socket.IO*

GitHub

- Developed a full-stack disaster alert system providing real-time emergency notifications and location-based alerts.
- Implemented geospatial visualization of safe zones, danger zones, and affected regions using Leaflet.js.
- Built secure backend APIs and scalable database models for alert management and user tracking.
- Integrated Socket.IO for real-time updates and responsive disaster monitoring dashboards.

**AI Resume Analyzer** | *Spring Boot, React.js, PostgreSQL, Gemini AI*

GitHub | Live

- Developed an AI-powered ATS resume analysis platform for evaluating resumes and identifying skill gaps.
- Integrated Gemini AI to generate personalized resume improvement suggestions.
- Implemented secure authentication using JWT and REST APIs for resume processing workflows.
- Built a responsive React frontend displaying real-time analysis results and recommendations.

## Achievements

- Solved 120+ Data Structures and Algorithms problems on LeetCode.
- Developed and deployed 8+ Full Stack applications using React.js, Next.js, and modern web technologies.
- Strong foundation in API Design, Authentication, Database Design, and Scalable Web Application Development.
